

DIN Rail Meter Accessories - IP65 Wall Mount Enclosure

The enclosure suits our wide range of DIN rail monitors & transmitters and provides IP65 environmental protection.

Applications include measurement of:

DC Voltage/Current, AC Voltage/Current, Total, Count, Frequency/Rate, Conductivity, pH, Redox, Temperature, RS232/RS485/RS422/Serial Current Loop, BCD/Binary etc.

The enclosure will hold one or two DIN rail meters (44 (w) x 91(h) x 141mm (d) meters shown) with room inside for wiring and, if required, additional terminal strips. The transparent lid allows good visibility for display viewing. A version with a non transparent lid suitable for instruments with no display is also available.

The housing has a two piece body, glass fibre reinforced polycarbonate is used for the base and transparent polycarbonate for the lid.

Instruments fit securely into the housing and are held by rail mount clips. The housing can be mounted on a wall or other flat surface.

Dimensions:

110mm (w) x 180mm (h) x 165mm (d)

Mounting Hole Locations:

165mm (w) x 95mm (h)

Note: alternative mounting holes are situated: 120mm (w) x 50mm (h).

Order Code: ENC-RM1/2-01
